

GLOBAL EU MDR IMPLEMENTATION

A global manufacturer of medical devices is obligated to comply with the EU Medical Device Regulation 745/2017 in order to maintain their products on the EU market.

A client with strong Quality and Regulatory knowledge did not have the experience and resources to bring a global program of this magnitude through the necessary assessment, planning and execution phases.

The client turned to Trinzo for support.

8 MONTHS

87 PROJECT TEAMS

250 TECHNICAL FILES

7 GLOBAL LOCATIONS

OBJECTIVES

Develop a global approach for the implementation of the EU MDR across seven global sites

Develop a governance model and program structure that was standardized and scalable across seven global sites

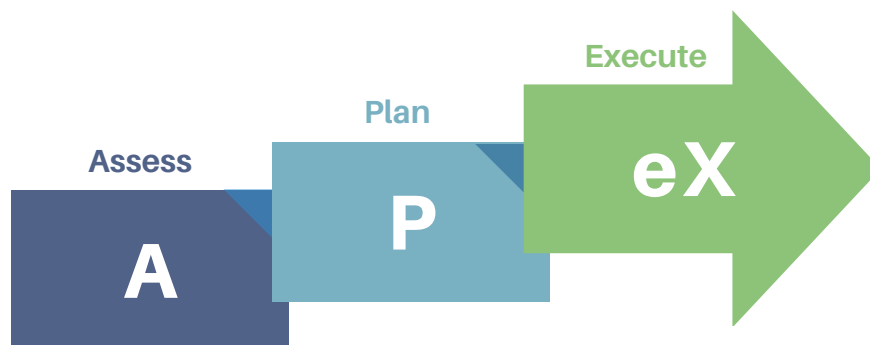

Remove the management burden of the program as internal staff were heavily loaded

Develop standard toolkit to facilitate remote and group collaboration

THE TRINZO APEX APPROACH TO MANAGING A PROJECT

Assess

- ✓ Base the initial State
- ✓ Build structure
- ✓ Move to planning

Plan

- ✓ Work package deliverables
- ✓ Breakdown structures
- ✓ Detailed Project & Resource plan
- ✓ Stakeholder analysis
- ✓ Sign-off charter
- ✓ Move to execution

Execute

- ✓ Project teams move to execution
- ✓ Project teams report progress

THE RESULTS

0 Findings

All change orders were completed with 0 findings on the MDR readiness audit

€450K Saved

Project was brought to completion €450K ahead of budget

233 Members

233 team members were fully engaged and mobilized throughout

8 Months

From planning to full execution, this project was handed over in 8 months

CLIENT TESTIMONIAL

"What I liked about Trinzo was the fact that they provided a very practical approach that was sensitive to the challenges of running a business.

The team and people selected were also a great fit. I would have no hesitation in recommending Trinzo as a partner to work with."
